515 Matte White Paper

Description: This material has an excellent, ultra-smooth surface that provides high-quality thermal transfer printing, with good smudge and scratch resistance. It is only slightly thinner than our premium paper yet has improved opacity and comparable brightness. The general purpose adhesive offers excellent initial tack and ultimate bond to a wide variety of surfaces. It also has a lower application temperature and a broader service temperature range than even our "Best" thermal transfer paper.

Complies with FDA 12 CFR 175.105 for indirect food contact

Recommended Printing Ribbons: This material can be printed with a good range of ribbon formulas including our T38 Wax and T44 Wax/Resin

	Face Stock	Adhesive	Liner
Type	Paper	Permanent Acrylic	Bleach Coated Kraft
Color	White	Clear	White
Caliper	2.9 mil	0.5 mil	2.4 mil
